

9CIRCLE[®] MP99 FOR ENGINE OIL MP99 TREATMENT & CONDITIONER

Product Code: EOT
Net.Wt. 12 fl.oz. (350 mL)
30/box

INTRODUCTION

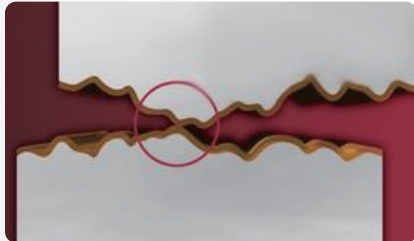

Two critical functions of oil lost with use are: (a) the lubrication film leaves on the surfaces of parts, which minimizes internal damage and metal-on-metal wear: and(b) the viscosity, or thickness of the oil which plays a role in keeping the sludge and debris in suspension for removal with oil change instead of build-up internally. The end results of this oil break down are (a) a loss in engine power, (b) a loos in fuel economy, (c) valves and pistons to ping or rap, (d) increases the possibility of damage resulting from inadequate lubrication on parts, and (d) accumulation of sludge and varnish on internal engine parts which hinder normal engine operation.

DESCRIPTION:

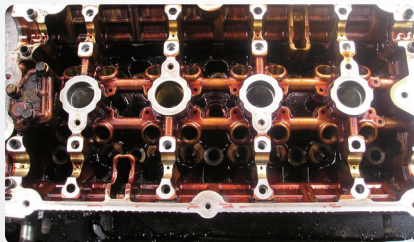

9CIRCLE combines exceptional lubricity and performance-aiding additives to bring you MP99 Engine Oil Treatment & Conditioner, a multi-purpose formula designed to penetrate and restore surfaces susceptible to the formation of sludge and varnish while strengthening the lubrication film to keep control deposits. As contaminants are lifted from these surfaces, the amount of friction and wear diminishes within the crankcase.

BENEFITS:

- Works to reduce friction & wear

- Removes & prevents sludge

- Quiets noisy lifters & valves

- Increases fuel economy
- Helps maintain target viscosity of engine oil
- Increases engine life due to improved oil circulation

* **Packaging and or label graphics may vary**

DIRECTIONS

Add entire contents of bottle to engine sump. Do not overfill. Treats up to 6 liters of engine oil. MP99 Engine Oil Treatment & Conditioner may be used between oil changes, however, best results are achieved when used at each oil change.
